

# Mathews Thomas

## Software Developer(MERN)

Enthusiastic and results-driven MERN stack developer with a strong background in designing and implementing web applications. Proficient in leveraging the power of MongoDB, Express.js, React, and Node.js to create scalable and responsive solutions. Adept at collaborating with cross-functional teams to analyze requirements, define technical specifications, and deliver high-quality software within established deadlines.

## PROJECTS

### Clinical Management System (04/2023 - Present)

- Designed and implemented the patient registration and management module, improving data accuracy and patient tracking.
- Developed a dynamic appointment scheduling system with calendar integration, enhancing the efficiency of clinic operations.
- Created secure APIs for handling Electronic Medical Records (EMR) and billing information, ensuring data privacy and compliance.
- Deployed the application using Docker containers on AWS, providing scalability and reliability for the clinic's operations.

### Medical Website (04/2024 - 06/2024)

- Developed a responsive and user-friendly website for a medical clinic, ensuring accessibility across various devices.
- Implemented an online appointment booking system, streamlining the process for patients to schedule visits.
- Designed the frontend layout using React.js and Bootstrap, delivering a modern and visually appealing user interface.
- Deployed the website on Heroku, enabling continuous integration and delivery for ongoing updates and maintenance.

### Company Website (03/2024 - 04/2024)

- Created a professional and modern website to showcase the company's services, portfolio, and team members, enhancing online presence.
- Developed a portfolio section to display completed projects, attracting potential clients with detailed case studies.
- Implemented a dynamic blog section for industry news and updates, engaging visitors with relevant content.
- Deployed the website on Netlify, ensuring fast load times and reliable performance.
