Redux Toolkit

PROJECTS

POS (04/2024 - Present)

- Implemented Redux Toolkit for managing orders, tables, customers, cart, and user flow. Built interactive Table Booking module (table status, occupied/free indicators, reservations).
- Developed Home Delivery flow (address input, delivery slot selection, live order status). Implemented Takeaway booking with quick order creation and pickup time selection.
- Developed Dynamic Cart with item modifiers, quantity updates, and price calculation. Implemented Payment Integration UI (UPI, card, cash, wallet) with success/failure callbacks.

Ticket Portal System (02/2024 - Present)

- Implemented Redux Toolkit for global state management of tickets, user data, and UI states. Added ticket creation/edit screens with form validation. Developed advanced filtering (status, priority, category), search, and pagination.
- Designed the frontend layout using React.js and Tailwind, delivering a modern and visually appealing user interface.
- Designed dashboard components showing ticket metrics and analytics. Created reusable UI components (modals, forms, tables, badges). Implemented protected routes and role-based UI restrictions.

VanSale Portal (01/2024 - Present)

- Designed and developed all UI pages using React.js + Tailwind CSS. Implemented Redux Toolkit slices for vans, products, routes, sales, and authentication. Integrated with backend APIs using Axios for sales entry, stock, and reports.
- Built dynamic tables with sorting, filtering, search, and pagination. Created responsive invoice pages and print-friendly views.
- Implemented dashboard cards and charts for daily/weekly sales summaries. Built reusable components (inputs, selects, cards, buttons).
